CYB102 Project 7

( [Instructions Page](#))

 Student Name: Giancarlo Montes

 Student Email: giancarlo.montes001@mymdc.net

Reflection (Required)

 **Reflection Question #1:** If I had to **explain “what is an IOC” in 3 emojis**, they would be...
(Feel free to put other comments about your experience in this unit here, too!)

 **Reflection Question #2:** If you found out that an IP address was reported malicious a year ago, would you still consider it dangerous? Why or why not?

YES!! The IP address can still have traces of malicious behavior despite being 1-year old, never trust an old threat!

 **Shoutouts:** Share appreciation for anyone who helped you out with this project or made your day a little better!

Bonus Task #1

Import a new set of IOC data into Splunk, then search your network data for matches.

A link to the threat source used:

TODO

Screenshot(s) of your Splunk search that shows you investigating with the newly imported data:
